

NEW!

THE E-Z TO INSTALL ADJUSTER

We have taken the tried and true **Jones Stock Adjuster** and made it so easy to install.

All you have to do is grind $\frac{1}{32}$ " on the stock plate.
That's a 10 to 15 minute job!

The pad plate is profiled for KICK-EEZ medium-size pads. There is no grinding necessary.

You are ready to head for the gun club in 30 minutes!

Want to change your length-of-pull for winter and summer? Just install a thicker or thinner pad, no grinding!

See all of our adjusters!
